Dear Mrs Thornton

Application for Engineering Maintenance Technician Level 3 Apprenticeship

I am applying for your Engineering Maintenance Technician Level 3 Apprenticeship starting next September. I have a Level 2 Diploma in Engineering at Merit and GCSEs including maths at grade 6, combined science 6-6 and English language 5.

At college I fault-found motors and gearboxes in the workshop, and at home I rebuilt a 50cc scooter engine: I measured the wear, ordered the parts and kept a log of every step. Finding out why something has stopped working is the part I enjoy most.

Since leaving college I have worked full time in a builders' merchant warehouse, where I check deliveries, count stock each week and follow the yard's safety rules. I would like to train with Midshires because your apprentices work on the production lines from the first year.

My CV is attached. I can come to an assessment day at any time. Thank you for considering my application.

Yours sincerely

Kieran Walsh
