Dr Sunil Mehta
Head of Assay Development
Corvane Therapeutics
Building 4, Ouseley Science Park
Cambridge CB22 9QZ

Dear Dr Mehta

Application for Senior Scientist, Assay Development

I am applying for the Senior Scientist, Assay Development post at Corvane Therapeutics. I have a PhD in biochemistry and have developed protein assays at Fenwold Biologics since 2022, as a research scientist on three antibody programmes.

The work I am proudest of is a cell-based potency assay that cut the time to a result from five days to two. I designed and validated it, then trained the quality control team, who now run it on every batch.

I also co-wrote a successful £480,000 Innovate UK grant application for a new assay platform, and I supervise two placement students a year. Leading a small team on your antibody pipeline is the step I am ready for.

My CV is attached, and I can send my full publication list. Thank you for considering my application.

Yours sincerely

Dr Eleanor Marsh
