Ms Freya Lund
Engineering Manager
Harbourside Clinics
Floor 3, 40 Queen Square
Bristol BS1 4QP

Dear Ms Lund

Application for Software Developer (.NET and React)

I am applying for the Software Developer role on your patient booking team. I have four years' experience building a booking platform used by 1,200 gyms and studios, working in C#, .NET and React.

I built our waiting-list feature, which now fills about 9,000 cancelled places a month, and moved the payments service to a queue, which cut failed bookings at peak times by 60%.

I write tests first and review pull requests every day; coverage on our booking API rose from 48% to 81% while I worked on it. I am also on the on-call rota and write up each incident with its fix and follow-up.

Booking a clinic appointment is a harder problem than booking a class, and I would like to work on it. My CV and GitHub link are attached. Thank you for considering my application.

Yours sincerely

Daniel Kowalski
