

Daniel Kowalski

Software Developer

Bristol | 07700 900224 | daniel.kowalski@example.com | github.com/dkowalski-example

Profile

Software developer with four years building a booking platform used by 1,200 UK gyms and studios. Works across C# and .NET APIs and a React front end, writes tests first and ships small changes every day. Looking for a mid-level or senior developer role on a product team.

Experience

Software Developer, Classbook Systems, Bristol	2023–present
- Built the waiting-list feature in C# and React; it now fills about 9,000 cancelled places a month. - Moved the payments service to a queue, cutting failed bookings at peak times by 60%. - Write unit and integration tests and review pull requests; test coverage on the booking API rose from 48% to 81%. - Take part in the on-call rota and write up incidents with the fix and the follow-up.	
Junior Developer, Classbook Systems, Bristol	2022–2023
Fixed bugs from the support queue and wrote release notes for each change.	

Education

BSc (Hons) Computer Science, 2:1, University of Avonmouth	2019–2022
Microsoft Certified: Azure Developer Associate	2024

Tech

- C#, .NET 8, ASP.NET Core - TypeScript, React - SQL Server, Azure Service Bus - Git, GitHub Actions, Docker	
--	--

Skills
