Skills

- TypeScript, JavaScript, HTML, CSS
- React, Next.js, Node.js
- PostgreSQL and REST APIs
- Git, GitHub Actions, Playwright
- WCAG 2.2 and screen reader testing

Profile

Web developer with six years at a digital agency, the first two as an apprentice, building websites and web apps for retail, charity and public sector clients. Works in TypeScript, React and Next.js on the front end and Node.js with PostgreSQL behind it, builds to WCAG 2.2 AA and writes automated tests. Looking for a full stack role in a product team.

Experience

Web Developer
Northern Quarter Digital, Manchester · 2022–present

- Build and maintain sites and web apps for nine clients, from planning meetings and prototypes with the design team to release.
- Rebuilt a charity's donation pages in Next.js; they now load in under 2 seconds on a mid-range phone, down from 6.
- Built a Node.js API that moves stock levels from a retailer's warehouse system into its online shop every 15 minutes.
- Fix accessibility issues so client sites meet WCAG 2.2 AA, checked with automated tests and a screen reader.
- Review code and pair with two junior developers each week.

Apprentice Web Developer
Northern Quarter Digital, Manchester · 2020–2022

- Built page templates and components from Figma designs, and fixed bugs found by the test team.

Qualifications

Software Developer Level 4 Apprenticeship, Distinction
2022

A levels: Computer Science (B), Mathematics (C), Business (C)
2020
